

Cleats for Hammocks

A range of cleats for tensioning hammock support ropes, tarp support cords, guylines and shockcord tension cords.
Six sizes available for ropes up to 8mm (5/16").

CL266 and CL260, ideal for lightweight shelters using small diameter lines.

CL276 and CL271 are for hammocks and larger material or canvas structures. They can hold up to 150 Kg (300 lbs).

CL826-72 and CL826-11AN can hold loads from 70 Kg (150 lbs) up to 180 Kg (400 lbs).
